

**Money and 'Real-life'  
Problems, Making  
Decisions and  
checking Results**

**Year 2 Summer Term Week 4**

**Lesson 2**

# Today we will be learning to:

- solve money problems
- recognise coins and be able to total
- make decisions and check results.

# Mental Activity

## Coins

### values and totals

Which four coins have the most value?

What totals can you make using two coins?

What totals can you make using three coins?

What totals can you make using four coins?

# Main Activity

Today we are going to  
do some money puzzles that will involve  
making decisions  
and checking results.

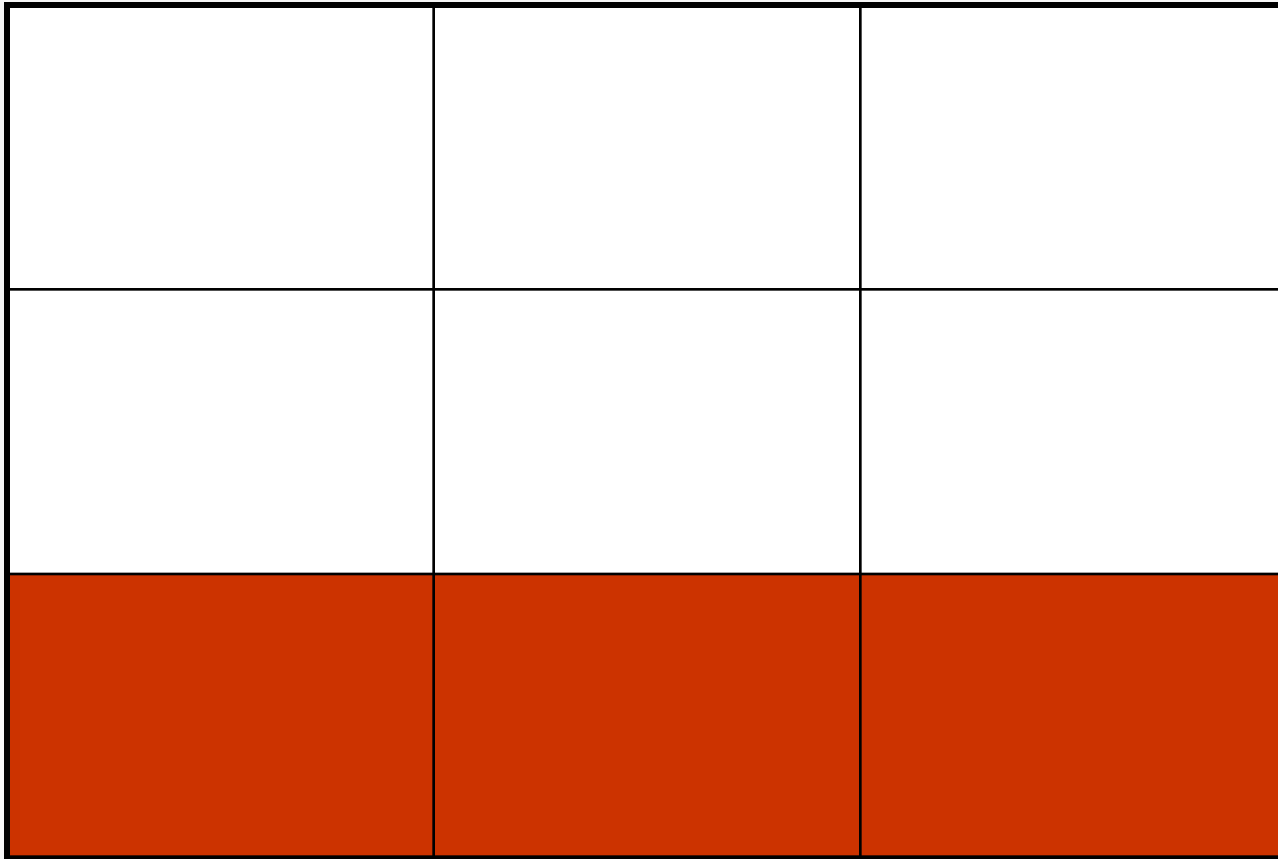

You will need a gird like this one.

Write a coin value in each box.

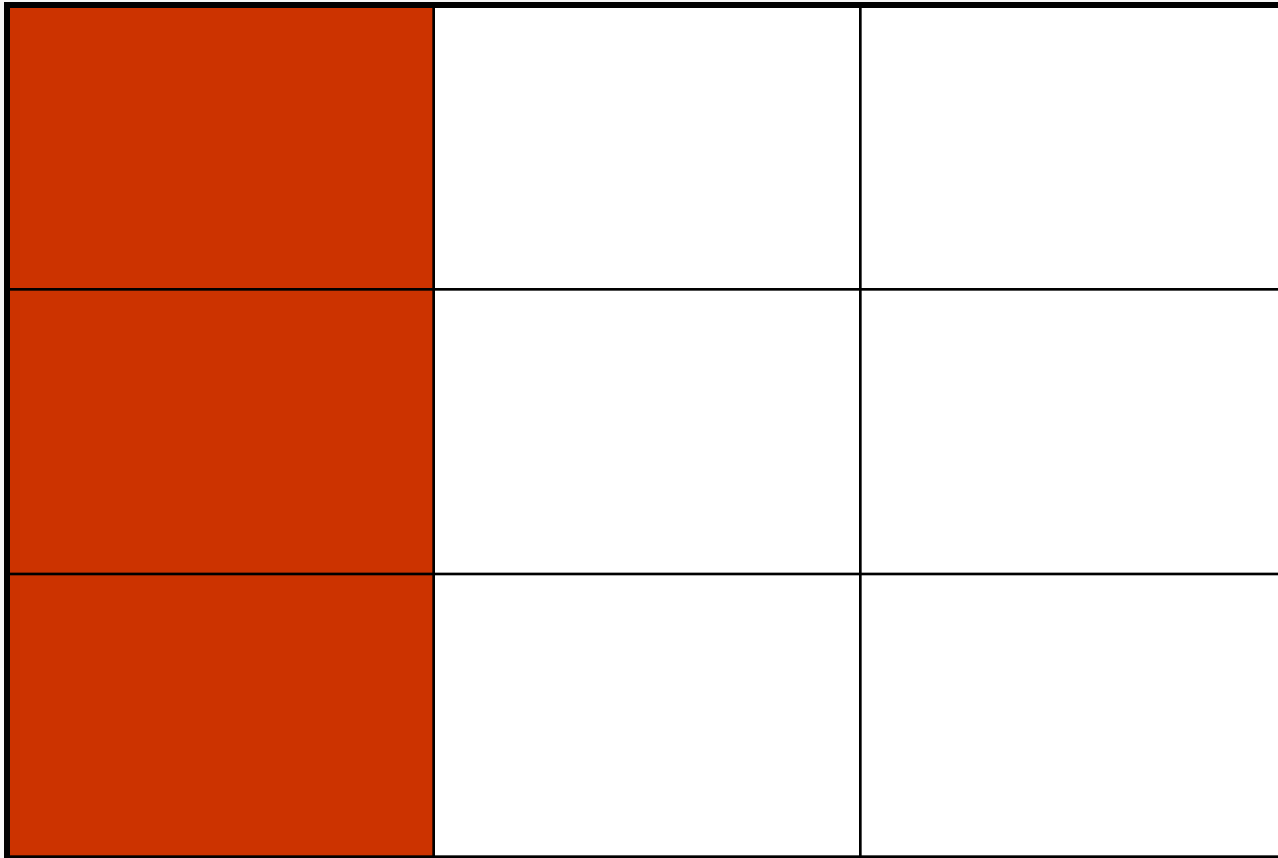

Total the coins along each horizontal.

Total the coins along each horizontal.

Total the coins along each horizontal.

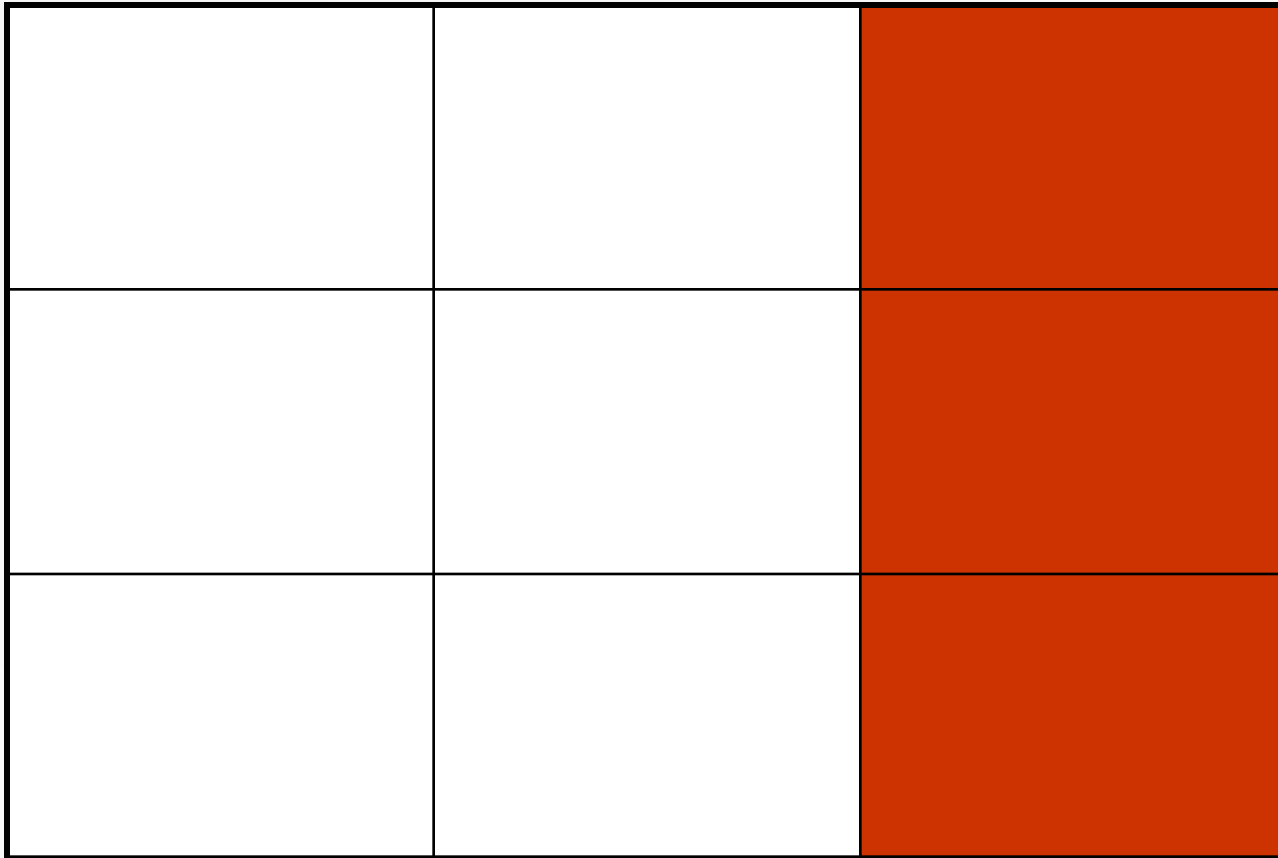

A 3x3 grid with a black border. The first column (leftmost) is shaded red. The other two columns are white.

Total the coins along each vertical.

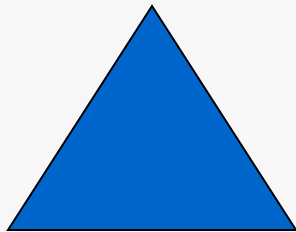

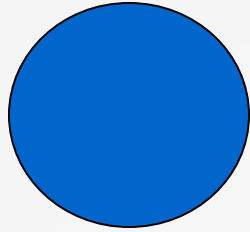

Total the coins along each vertical.

Total the coins along each vertical.

# Group Work

You have six 20p coins and three 10p coins. Position one coin in each space on a 3 x 3 grid so that the total in each row and each column is 50p.
