

Handling Data

Handling Data

Day 1

Year 2 Autumn Term Week 13

Lesson 3

Today we will be learning to:

- collect, record and interpret information
- present the data as a graph
- discuss the results.

Mental Activity

What is data collection?

Today we will find out what types of clothing boys and girls like to wear.

Work in pairs.

What sort of things will we be looking at?

How should we separate out the

- type of clothes
- colour of clothing
- and style of clothing.

Main Activity

Over the next three lessons we are going
to find out

and record information

about what you prefer.

Pretend the Headteacher is thinking of introducing or changing the school uniform.

They need to know what clothes you like to wear.

What types of clothing are there?

What can you say about

- colour
- pattern
- type
- boys and girls clothes?

You are now going to make a 'person block
bar chart'.

Choose a question to answer.

Decide which choice you like.

Join that line of children.

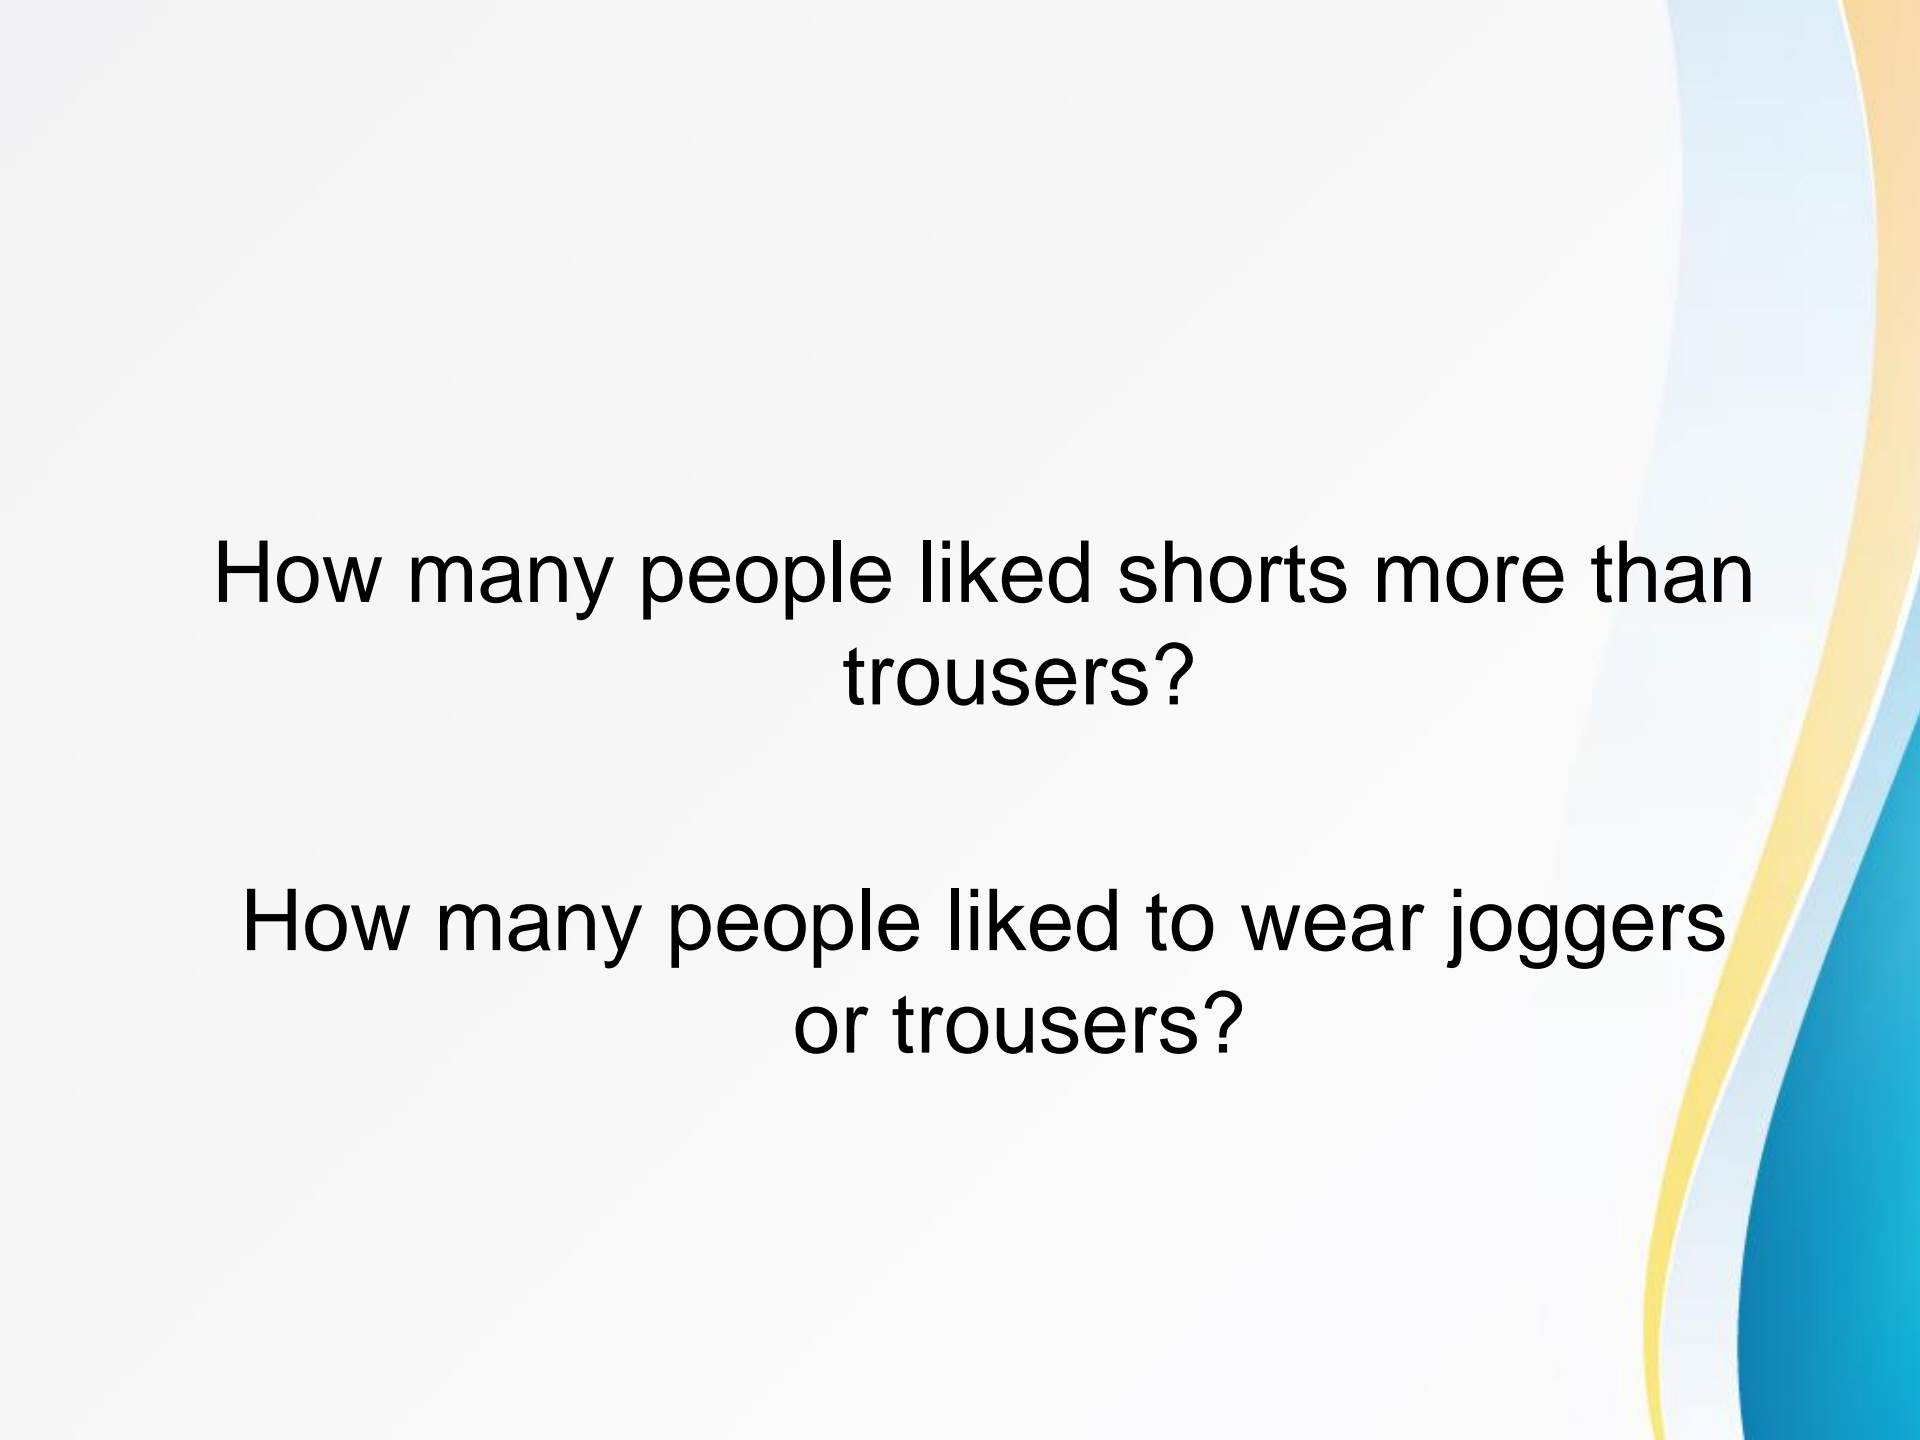

When all are seated you have made a chart.

Repeat for different questions.

What was the most popular choice overall?

Which was the most popular option?

Which was the least popular option?

How many people liked shorts more than trousers?

How many people liked to wear joggers or trousers?

How many were asked
altogether?

Was there an option that
no one wanted?

Should it have been shown?
