

# Capacity

*Year 2 Summer Term Week 12*

*Lesson 5*

# Today we will be learning to:

- estimate capacities
- compare capacities.

# Mental Activity

Counting in tens.

Counting in tens.

Start at 0.

Count to 100 and back again.

Counting in tens.

Choose a new start number.

Count to 100 and back again.

Counting in tens.

Choose another new start number.

Count to 100 and back again.

# Main Activity

Today we will compare capacities of containers.

Please remind me  
what **capacity**  
means?

**Capacity** is how  
much a container  
can hold.

Look at a collection of containers.

Which will hold the most water?

Take any two containers.

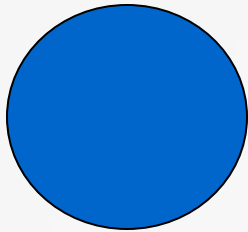

Which container will hold more water?

How could we check this?

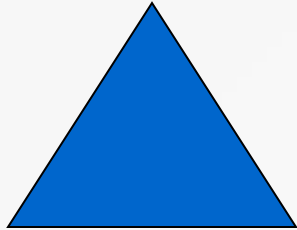

# Group Work

Compare containers.

Solve one-step capacity problems.

Solve two-step capacity problems.
